

Stairtreads

AS3

AS4

AS6

STYLE AS.6.

This stairtread is used on indoor stairs only, providing an anti-trip base, a slip resistant insert and security underfoot. This stairtread is ideal for theatres, restaurants, offices and colleges. When fitted on worn step edges, it will extend the life of the carpet considerably, or it can be fitted when new carpet is installed to double the carpet life and improve the safety and appearance.

COLOURS

BASES: Gold, Bronze, Clear Anodised, Beige, Pink, Black, Light/Dark Grey, Claret, Green and Brown.

PVC INSERTS: Brown, Tan, Black, Beige, Red, Blue, Pink, Light/Dark Grey, Light/Dark Green and Terracotta.

**Now also available in luminous safety stripe.

STYLE AS.3.

This stairtread is applied to any hard surface step edges such as brick tile, steel, terrazzo, vinyl or bare timber, indoors or outside that are slippery or damaged. Apart from the non-slip qualities of the tread, it also protects the stair edge from trolley damage etc. Luminous or reflective strips can also be fitted to the profile for the sight impaired or low light areas.

COLOURS

BASES: Gold, Bronze, Black or Clear Anodised.

Clear anodised is the most practical choice for commercial areas.

STYLE AS.4

This stairtread is used indoors (with PVC inserts) or outdoors (with silica carbide inserts) on carpet tiles or any hard surface step such as vinyl, timber, ceramic tiles and terrazzo that require an architectural finish as well as added step protection and safety.

COLOURS

BASES: Gold, Bronze, Black and Clear Anodised.

INSERTS PVC: Dark Grey, Black and Brown.

INSERTS SILICA CARBIDE: Black, safety yellow, blue, green and red.
